# Ethical, Legal and Societal Considerations

## Introduction

*Provide here an overview of the contents (structure) of this chapter.*

## Stakeholders and Impact

Identification of affected stakeholders

Expected benefits

Potential risks

## Data Governance and Privacy

Data sources

Personal data processing

Data protection measures

Data ownership and access

## Fairness and Bias

Potential sources of bias

Dataset representativeness

Mitigation strategies

## Transparency and Accountability

Explainability of the solution

Human oversight

Responsibilities and limitations

## Sustainability Considerations

Economic sustainability

Social sustainability

Environmental impact (if relevant)

## Compliance and Risk Assessment

Applicable regulations

Ethical risks

Mitigation measures

## Summary

*Provide here the conclusions of this chapter and make the bridge to the next chapter.*

Based on this ethical and deontological analysis, the team chose <specify here the design, technique(s) material(s), component(s)> for the following <specify here the relevant ethics-related reasons>. Consequently, the team decided to design a solution with the following <specify here the features added for ethical reasons>.
